

NOTICE OF ACTIVITIES

Please be advised that TimberWest has begun road building activities in our Private Managed Forest lands north of Otter Point Road near Sooke. The above 1:50,000 scale map shows the roads that are currently being built in bold red.

Blasting for these roadways has commenced and will continue periodically throughout the project Monday to Friday, from 8:00am to 5:00pm, ending April, 2017. Efforts are being made to reduce the noise and impacts of the blasting activities.

At TimberWest safety is our highest priority. When active road-building is taking place our employees and contractors abide by strict safety rules. We expect, and strongly encourage, private citizens to abide by our safety focus and respect our worksite by not entering any active areas. For your safety, and the safety of our employees and contractors, please adhere to posted advisory signs.

Our sincere apologies for any inconvenience this may cause. If you have any questions or require further clarification please contact our TimberWest office in Nanaimo at 250-716-3700.

Thank you for your co-operation,
TimberWest
